

Corporate Sponsorship Opportunities

Physician Assistants add unique value to health care providers through physician collaboration. They enable health care organizations to deliver more health care without adding physicians.

The Alaska Academy of PAs provides support to member PAs through continuing education programs, monitoring of relevant state and federal industry regulation, and by providing practitioners and their employers with a point of contact for sharing opinions, ideas, employment opportunities, and general industry camaraderie.

Your organization has been identified as an employer of physician assistants. We are asking for sponsor support of the AKAPA through an annual contribution that will benefit the PA profession as a whole and that has value to you as an employer of PAs. The Academy thanks you for supporting the PA profession.
